

IB User Resource Agent Guide

A simple guide to data, training, funding, jobs, food safety, land, production, community programs and other support resources

191 governed resources organized into 25 categories

Every source name and Open resource link is clickable. The table of contents is also clickable.

Prepared for INDYpendent Bytes

Catalog version: July 22, 2026

How to use this guide

Use the table of contents to jump to a resource category. Under each source, Good for explains the resource in plain language. Best for shows the people who are most likely to use it. Keep in mind flags the most important limitation. Click Open resource to visit the source website.

Websites, deadlines, program capacity, laws and job openings can change. The IB agent should check time-sensitive information again before presenting it as current.

What this guide is not

This guide does not guarantee funding, enrollment, employment, legal compliance, land access, buyer demand or program acceptance. It is a clear starting point that helps users find the right information and the right next contact.

Table of Contents

Statistics, Research & Impact Measurement	4
Regional Statistics & Expansion Intelligence	5
Community Data, Food Access & Equity	7
Markets, Business & Economic Intelligence	8
Production & Technical Guidance	9
Land, Water, Climate & Conservation	11
Food Safety, Compliance & Certification	13
Training, Education & Skill Development	16
Funding, Grants & Financial Assistance	17
Programs, Events & Opportunities	20
Connections, Directories & Market Access	21
Procurement, Distribution & Buyer Resources	23
Community Programs, Food Access & Engagement	24
Well-being, Crisis & Farm Resilience	26
Policy, Research & System Context	27
Regulation, Trade & Future Expansion	29
Needs Review	30
Emergency Preparedness, Recalls & Response	31
Tools, Equipment & Shared Infrastructure	32
Land Access, Leases & Local Regulation	33
Startup Acceleration, Capital & Commercialization	35
Property, Parcels & Site Intelligence	38
Composting, Waste & Circular Resources	40
Employment, Reentry & Inclusive Workforce	41
Connections, Directories & Referrals	43

Statistics, Research & Impact Measurement

Official statistics, research, baseline measures, impact methods and source governance.

[Back to table of contents](#)

USDA Economic Research Service

Good for: Primary source for food security, farm economy, food markets, local food systems and agricultural outlook research.

Best for: trainers and mentors, funders and researchers, IB operators, developers and data teams

Source: USDA Economic Research Service | United States | Active

Keep in mind: Do not cite the homepage when a specific report or data product is available.

[Open resource](#)

USDA Food Loss and Waste

Good for: Explain the food-loss problem, design waste-prevention measures and support impact narratives.

Best for: nonprofit buyers, restaurants, institutions, funders and researchers, IB operators, and others

Source: U.S. Department of Agriculture | United States | Active

Keep in mind: National estimates are context only.

[Open resource](#)

USDA Research and Science

Good for: Route research questions to USDA research and statistical agencies such as ERS, NASS, ARS and NIFA.

Best for: trainers and mentors, funders and researchers, IB operators, developers and data teams

Source: U.S. Department of Agriculture | United States | Active

Keep in mind: Directory-level source.

[Open resource](#)

Regional Statistics & Expansion Intelligence

County, regional, demographic, economic, agricultural and infrastructure comparisons.

[Back to table of contents](#)

IARC Data Dashboard

Good for: Compare regional economic and demographic shifts and identify regional planning partners.

Best for: technical-assistance partners, funders and researchers, IB operators, developers and data teams

Source: Purdue Center for Regional Development / Indiana Association of Regional Councils | Indiana | Active

Keep in mind: Regional aggregates may be too broad for pilot-site decisions.

[Open resource](#)

Indiana County Data Snapshots

Good for: Produce quick county needs assessments, grant context and comparison snapshots.

Best for: technical-assistance partners, funders and researchers, IB operators, developers and data teams

Source: Purdue Center for Regional Development | Indiana | Active

Keep in mind: Interactive content may not parse automatically; verify indicators and vintage before quoting.

[Open resource](#)

Indiana Entrepreneurship Scorecard

Good for: Provides county-level entrepreneurship indicators for comparing Indiana ecosystems and supporting grant or expansion narratives.

Best for: community organizations and local government, technical-assistance partners, funders and researchers, IB operators, developers and data teams

Source: Indiana Economic Development Corporation | Indiana | Current official data source

Keep in mind: Do not combine different vintages or treat ecosystem indicators as proof of IB demand or success.

[Open resource](#)

Indy Data Portal

Good for: Provides a broad official local-data discovery and API route for Indianapolis planning and operations.

Best for: community organizations and local government, technical-assistance partners, funders and researchers, IB operators, developers and data teams

Source: City of Indianapolis | Indianapolis, Indiana | Current official data portal

Keep in mind: The portal itself is not the dataset; avoid mixing incompatible layers or vintages.

[Open resource](#)

NASS Census Data Query Tool — Chapter 1, Table 1

Good for: Explore Census of Agriculture table data for farm structure, production and regional agricultural capacity.

Best for: technical-assistance partners, funders and researchers, IB operators, developers and data teams

Source: USDA NASS | United States | Needs manual validation

Keep in mind: Interactive page did not parse reliably in automated review.

[Open resource](#)

Regional Rural Development Centers

Good for: Identify rural-development research, technical assistance, networks and partnership opportunities.

Best for: technical-assistance partners, funders and researchers, IB operators, developers and data teams

Source: Regional Rural Development Centers / Purdue-hosted site | United States | Active

Keep in mind: Network portal, not a grant guarantee or local operating dataset.

[Open resource](#)

Reliable Energy Siting through Technical Engagement and Planning (R-STEP)

Good for: Future reference when energy infrastructure, renewable siting or community planning affects a hub or facility.

Best for: land hosts, community organizations and local government, technical-assistance partners, funders and researchers, IB operators, and others

Source: U.S. Department of Energy | United States | Reference for future infrastructure

Keep in mind: Peripheral to the current N-OS pilot and not a food-system funding source.

[Open resource](#)

Rural Indiana Stats

Good for: Compare Indiana counties across agriculture, socioeconomic conditions, housing, broadband and fiscal capacity.

Best for: technical-assistance partners, funders and researchers, IB operators, developers and data teams

Source: Purdue Center for Regional Development / Indiana OCRA | Indiana | Active

Keep in mind: County-level indicators may hide neighborhood differences and do not prove IB readiness alone.

[Open resource](#)

STATS Indiana

Good for: Core Indiana source for population, income, poverty, employment, agriculture, broadband and regional profiles.

Best for: nonprofit buyers, restaurants, institutions, technical-assistance partners, funders and researchers, and others

Source: Indiana Business Research Center, Indiana University | Indiana | Active

Keep in mind: A portal to many datasets; definitions, vintages and original sources must be preserved.

[Open resource](#)

StatsAmerica

Good for: Compare target geographies and build regional profiles using multiple public datasets.

Best for: technical-assistance partners, funders and researchers, IB operators, developers and data teams

Source: Indiana Business Research Center, Indiana University | United States | Active

Keep in mind: Aggregates multiple sources; preserve original definitions and do not double-count duplicated indicators.

[Open resource](#)

USDA Agricultural Projections to 2035

Good for: Long-range scenario context for national agriculture, trade and macroeconomic assumptions.

Best for: funders and researchers, IB operators, developers and data teams

Source: USDA ERS | United States | Active

Keep in mind: Scenario baseline, not a forecast guarantee and not granular enough for weekly production decisions.

[Open resource](#)

USDA Broadband

Good for: Assess digital-access constraints and identify rural broadband resources relevant to platform adoption.

Best for: beginning growers, active growers, technical-assistance partners, funders and researchers, IB operators, and others

Source: U.S. Department of Agriculture | United States | Active

Keep in mind: Not a broadband coverage dataset.

[Open resource](#)

USDA Infrastructure

Good for: Frame rural infrastructure needs and navigate to relevant USDA programs.

Best for: technical-assistance partners, funders and researchers, IB operators, developers and data teams

Source: U.S. Department of Agriculture | United States | Active

Keep in mind: High-level portal, not a local feasibility dataset or grant award notice.

[Open resource](#)

Community Data, Food Access & Equity

Population, poverty, food security, nutrition-program and community-need resources.

[Back to table of contents](#)

American Community Survey Data via API

Good for: Retrieve population, income, poverty, household, transportation, demographic and housing indicators.

Best for: nonprofit buyers, restaurants, institutions, community organizations and local government, technical-assistance partners, and others

Source: U.S. Census Bureau | United States | Active

Keep in mind: Estimates include margins of error.

[Open resource](#)

Measuring Communities

Good for: Support IB's military and veteran ownership pathway with community indicators and service-gap context.

Best for: nonprofit buyers, institutions, community organizations and local government, technical-assistance partners, funders and researchers, and others

Source: Purdue Military Family Research Institute | United States | Active

Keep in mind: Specialized to military and veteran families; not a general community-needs dataset.

[Open resource](#)

U.S. Census Bureau

Good for: Authoritative entry point for demographic, economic, business and geographic data.

Best for: nonprofit buyers, restaurants, institutions, community organizations and local government, technical-assistance partners, and others

Source: U.S. Census Bureau | United States | Active

Keep in mind: Homepage is a portal.

[Open resource](#)

USDA Food Security

Good for: Provide high-level food-security framing and route users to current ERS measures.

Best for: nonprofit buyers, restaurants, institutions, community organizations and local government, technical-assistance partners, and others

Source: U.S. Department of Agriculture | United States / international context | Active

Keep in mind: Page contains broad and sometimes historical content.

[Open resource](#)

USDA Nutrition Programs

Good for: Map buyer types and community needs to federal nutrition-program context.

Best for: nonprofit buyers, institutions, community organizations and local government, technical-assistance partners, funders and researchers, and others

Source: U.S. Department of Agriculture | United States | Active

Keep in mind: Program participation and procurement rules require program-specific verification.

[Open resource](#)

Markets, Business & Economic Intelligence

Prices, outlooks, labor markets, farm economics, demand, jobs and business dynamics.

[Back to table of contents](#)

Hoosiers by the Numbers

Good for: Assess employment, wages, occupations, industries, workforce conditions and business environment.

Best for: beginning growers, active growers, technical-assistance partners, funders and researchers, IB operators, and others

Source: Indiana Department of Workforce Development | Indiana | Active

Keep in mind: Labor-market data does not directly measure grower readiness, buyer demand or farm profitability.

[Open resource](#)

Hoosiers by the Numbers — Data Request

Good for: Request labor-market data that is unavailable through standard Hoosier Data tools.

Best for: active growers, technical-assistance partners, funders and researchers, IB operators, developers and data teams

Source: Indiana Department of Workforce Development | Indiana | Active / manual

Keep in mind: Not an immediate data source; response timing and availability may vary.

[Open resource](#)

ISDA Market Reporting Program

Good for: Use for covered Indiana livestock, dairy, hay or related market categories.

Best for: beginning growers, active growers, IB operators, developers and data teams

Source: Indiana State Department of Agriculture | Indiana | Active with limited crop relevance

Keep in mind: Not a dependable fresh fruit and vegetable wholesale benchmark for the IB Price Ladder.

[Open resource](#)

NASS Agricultural Prices — JSON Example PDF

Good for: Understand agricultural-price series and design NASS price-data queries or ingestion.

Best for: active growers, IB operators, developers and data teams

Source: USDA National Agricultural Statistics Service (NASS) | United States | Active

Keep in mind: Example/schema document, not a current price feed.

[Open resource](#)

Outlook for U.S. Agricultural Trade — May 2026

Good for: Macro context for agricultural trade conditions that may influence national markets and inputs.

Best for: active growers, funders and researchers, IB operators, developers and data teams

Source: USDA Economic Research Service (ERS) | United States | Active

Keep in mind: Not a local fresh-produce demand or price source.

[Open resource](#)

Purdue Agricultural Economics

Good for: Connect users to farm-business, market, land-value, food-demand, waste-reduction and regional-economic research and expertise.

Best for: beginning growers, active growers, restaurants, institutions, trainers and mentors, and others

Source: Purdue Department of Agricultural Economics | Indiana / United States | Active

Keep in mind: Department homepage is a directory.

[Open resource](#)

YourEconomy

Good for: Analyze business establishment, job and industry dynamics in target regions.

Best for: active growers, technical-assistance partners, funders and researchers, IB operators, developers and data teams

Source: University of Wisconsin Business Dynamics Research Consortium | United States | Active

Keep in mind: May require account/access for some features.

[Open resource](#)

Production & Technical Guidance

Agronomy, horticulture, pests, diseases, crop systems and specialist resources.

[Back to table of contents](#)

Fruit and Tree Nuts Outlook — March 2026

Good for: National fruit and tree-nut market context for advanced growers and long-term diversification analysis.

Best for: beginning growers, active growers, trainers and mentors, IB operators, developers and data teams

Source: USDA ERS | United States | Active

Keep in mind: Many perennial crops require site-specific expertise and long planning horizons.

[Open resource](#)

NASS Crop — JSON Example PDF

Good for: Map NASS crop acreage, yield, production, utilization and stocks series into planning-data structures.

Best for: active growers, trainers and mentors, IB operators, developers and data teams

Source: USDA NASS | United States | Active

Keep in mind: Availability matrix, not a live production forecast.

[Open resource](#)

NASS Data Visualization by Commodity

Good for: Quickly explore official commodity trends before retrieving precise underlying data.

Best for: beginning growers, active growers, trainers and mentors, IB operators, developers and data teams

Source: USDA NASS | United States | Active

Keep in mind: Visualization is for orientation.

[Open resource](#)

NASS Datasets and Quick Stats

Good for: Primary statistical source for agricultural production, prices, acreage, yields, farm counts and Census data.

Best for: beginning growers, active growers, trainers and mentors, IB operators, developers and data teams

Source: USDA NASS | United States | Active

Keep in mind: Query definitions and units must match the decision.

[Open resource](#)

Old Farmer's Almanac Indianapolis Planting Calendar

Good for: Provides an accessible location-based starting point for spring and fall planting windows and frost timing.

Best for: beginning growers, active growers, trainers and mentors, community members, IB operators

Source: The Old Farmer's Almanac / Yankee Publishing | Indianapolis, Indiana | Current secondary reference

Keep in mind: Dates use historical averages and can vary by station, ZIP code, microclimate, current weather and soil temperature.

[Open resource](#)

Purdue Agronomy Extension

Good for: Connect growers and instructors to timely agronomic research, specialists, events, newsletters and climate resources.

Best for: active growers, trainers and mentors, IB operators, technical-assistance partners, developers and data teams

Source: Purdue Department of Agronomy | Indiana / Midwest | Active

Keep in mind: Broad agronomy portal; use exact publication and crop applicability.

[Open resource](#)

Purdue Botany and Plant Pathology Extension

Good for: Connect growers to plant-disease, weed, diagnostic, pesticide and crop-production resources.

Best for: active growers, trainers and mentors, IB operators, technical-assistance partners, developers and data teams

Source: Purdue Department of Botany and Plant Pathology | Indiana / Midwest | Active

Keep in mind: Do not diagnose disease, recommend restricted pesticides or determine compliance from symptoms alone.

[Open resource](#)

Purdue Diversified Farming and Food Systems Team

Good for: Core Indiana technical-assistance partner for diversified farming, local food systems and grower education.

Best for: beginning growers, active growers, land hosts, trainers and mentors, IB operators, and others

Source: Purdue Extension | Indiana | Active

Keep in mind: Agent should route technical questions to appropriate experts rather than presenting generalized web content as site-specific instruction.

[Open resource](#)

Purdue Field Crops IPM

Good for: Support field-crop pest identification and direct users to Purdue IPM factsheets and specialists.

Best for: active growers, trainers and mentors, IB operators, developers and data teams

Source: Purdue Department of Entomology | Indiana / Midwest | Active with limited specialty-crop relevance

Keep in mind: Primarily field crops, not a complete specialty-crop diagnostic source.

[Open resource](#)

Purdue Horticulture and Landscape Architecture Extension

Good for: Provide regional science-based horticulture resources across vegetables, fruit, controlled environments, urban agriculture and business.

Best for: beginning growers, active growers, land hosts, trainers and mentors, IB operators, and others

Source: Purdue Department of Horticulture and Landscape Architecture | Indiana / Midwest | Active

Keep in mind: Home-gardening resources do not automatically meet commercial production or IB training standards.

[Open resource](#)

Vegetables and Pulses Outlook — April 2026

Good for: National vegetable and pulse supply, price, trade and consumption context for planning discussions.

Best for: beginning growers, active growers, trainers and mentors, IB operators, developers and data teams

Source: USDA ERS | United States | Active

Keep in mind: National outlook, not a crop prescription or guaranteed local demand signal.

[Open resource](#)

Land, Water, Climate & Conservation

Drought, climate, stormwater, forestry, landowner and conservation resources.

[Back to table of contents](#)

Indiana Soil and Water Conservation District Directory

Good for: Identify the correct county SWCD for soil, water, conservation and local technical assistance.

Best for: beginning growers, active growers, land hosts, trainers and mentors, technical-assistance partners, and others

Source: Indiana State Department of Agriculture (ISDA) | Indiana | Active

Keep in mind: SWCD capabilities vary by county.

[Open resource](#)

ISDA Soil Conservation Data Hub

Good for: Navigate to Indiana conservation data, reports, districts and related resources.

Best for: beginning growers, active growers, land hosts, technical-assistance partners, IB operators, and others

Source: Indiana State Department of Agriculture | Indiana | Active

Keep in mind: Portal page itself is not a standalone dataset.

[Open resource](#)

NASDA Bee Friendly Farming Toolkit — submitted link

Good for: Potentially support pollinator-friendly farm and land-management education once the current toolkit file is located.

Best for: beginning growers, active growers, land hosts, trainers and mentors, technical-assistance partners, and others

Source: NASDA Foundation | United States | Redirect / replacement required

Keep in mind: The submitted direct PDF returned an error.

[Open resource](#)

NOAA Local Climatological Data

Good for: Historical local temperature, precipitation, wind and weather observations for risk and site context.

Best for: beginning growers, active growers, land hosts, trainers and mentors, technical-assistance partners, and others

Source: NOAA National Centers for Environmental Information | United States | Active

Keep in mind: Historical station data is not a field-level forecast.

[Open resource](#)

Purdue Forestry and Natural Resources Extension

Good for: Connect landowners and communities to natural-resource planning, forestry, wildlife, water and land-management education.

Best for: land hosts, active growers, trainers and mentors, community organizations and local government, technical-assistance partners, and others

Source: Purdue Forestry and Natural Resources | Indiana | Active

Keep in mind: Not a substitute for site inspection, legal advice, forestry plan or environmental permitting.

[Open resource](#)

Purdue Rainscaping Education Program

Good for: Support rain-garden planning, installation, maintenance and community stormwater education.

Best for: land hosts, trainers and mentors, community organizations and local government, technical-assistance partners, community members

Source: Purdue Extension | Indiana | Active

Keep in mind: Does not replace engineered drainage design, local permits or site-specific assessment.

[Open resource](#)

U.S. Drought Monitor — Current Map

Good for: Monitor current drought intensity and support risk communication and reforecast discussions.

Best for: beginning growers, active growers, land hosts, trainers and mentors, technical-assistance partners, and others

Source: National Drought Mitigation Center, USDA and NOAA partners | United States | Active

Keep in mind: Drought category does not determine field moisture, irrigation capacity or crop outcome.

[Open resource](#)

USDA Agroforestry

Good for: Introduce agroforestry practices and route appropriate growers or land hosts to technical assistance.

Best for: beginning growers, active growers, land hosts, trainers and mentors, technical-assistance partners

Source: U.S. Department of Agriculture | United States | Active

Keep in mind: Requires site-specific professional guidance.

[Open resource](#)

USDA Landowner Assistance Programs

Good for: Route landowners to forestry and conservation assistance where applicable.

Best for: beginning growers, active growers, land hosts, technical-assistance partners

Source: U.S. Department of Agriculture | United States | Active

Keep in mind: Limited relevance to most urban Indianapolis sites; program eligibility is property-specific.

[Open resource](#)

Food Safety, Compliance & Certification

Food safety, wholesale rules, produce safety, GAP, audits and approved training pathways.

[Back to table of contents](#)

AAA Food Handler — Indiana Cottage Food Law Article

Good for: Provide a plain-language orientation to Indiana home-based food sales and a commercial training option.

Best for: beginning growers, active growers, trainers and mentors, IB operators, community members

Source: AAA Food Handler | Indiana / commercial provider | Secondary source — verify official

Keep in mind: Commercial article may be incomplete or outdated.

[Open resource](#)

ANAB Accredited Food Protection Manager Certification Directory

Good for: Verify which food-protection-manager certification programs currently hold relevant ANAB accreditation.

Best for: restaurants, institutions, trainers and mentors, IB operators, developers and data teams, and others

Source: ANSI National Accreditation Board | United States | Active — live verification required

Keep in mind: Accreditation status can change, and directory presence does not establish that a specific course format meets every Indiana employer or regulator requirement.

[Open resource](#)

eCFR Title 21, Chapter I, Subchapter B — Food for Human Consumption

Good for: Provide current federal regulatory text and route users to the exact part or section relevant to a food-safety or food-business question.

Best for: active growers, restaurants, institutions, trainers and mentors, technical-assistance partners, and others

Source: U.S. Government Publishing Office / eCFR | United States | Active — live legal source

Keep in mind: Subchapter B is broad.

[Open resource](#)

FDA FSMA Final Rule on Produce Safety

Good for: Serve as the primary federal entry point for Produce Safety Rule requirements, updates, guidance and linked resources.

Best for: beginning growers, active growers, nonprofit buyers, restaurants, institutions, and others

Source: U.S. Food and Drug Administration | United States | Active

Keep in mind: The page is a rule hub, not a complete farm determination.

[Open resource](#)

IDOH Food Protection Laws, Rules and Regulations

Good for: Route Indiana food-protection questions to the current federal and state laws and rules identified by IDOH.

Best for: active growers, nonprofit buyers, restaurants, institutions, trainers and mentors, and others

Source: Indiana Department of Health | Indiana | Active

Keep in mind: A link collection is not a legal determination.

[Open resource](#)

Indiana Code 16-42-2 — Adulteration and Misbranding

Good for: Provide the official 2024 statutory text addressing adulterated or misbranded food and support legal-source tracing.

Best for: active growers, restaurants, institutions, trainers and mentors, technical-assistance partners, and others

Source: Indiana General Assembly | Indiana | Historical official snapshot — verify current

Keep in mind: The link is the 2024 Code.

[Open resource](#)

Indiana Code 16-42-2-3 — Prohibited Food Acts

Good for: Provide the official 2024 text of a specific Indiana food-law section for precise legal-source tracing.

Best for: active growers, restaurants, institutions, trainers and mentors, technical-assistance partners, and others

Source: Indiana General Assembly | Indiana | Historical official snapshot — verify current

Keep in mind: The link is the 2024 Code and cannot establish current legality or liability by itself.

[Open resource](#)

Indiana Code 16-42-5 — Food: Sanitary Requirements

Good for: Provide the official 2024 statutory text for Indiana food sanitary requirements and support legal-source tracing.

Best for: active growers, restaurants, institutions, trainers and mentors, technical-assistance partners, and others

Source: Indiana General Assembly | Indiana | Historical official snapshot — verify current

Keep in mind: The link is the 2024 Code.

[Open resource](#)

Indiana Code 16-42-5.2 — Food Safety Requirements

Good for: Provide the official 2024 statutory text for Indiana food-safety requirements and support legal-source tracing.

Best for: active growers, restaurants, institutions, trainers and mentors, technical-assistance partners, and others

Source: Indiana General Assembly | Indiana | Historical official snapshot — verify current

Keep in mind: The link is the 2024 Code.

[Open resource](#)

Indiana Department of Health Food Protection

Good for: Serve as the official Indiana entry point for food-protection programs, laws, produce safety, recalls, training and regulatory contacts.

Best for: beginning growers, active growers, nonprofit buyers, restaurants, institutions, and others

Source: Indiana Department of Health | Indiana | Active

Keep in mind: The portal is a navigation source, not a complete answer to any specific legal or compliance question.

[Open resource](#)

Indiana Department of Health — Starting a Wholesale Food Business

Good for: Explain when an Indiana operation may be a wholesale food business and route it through registration, facility and regulatory startup requirements.

Best for: beginning growers, active growers, restaurants, institutions, trainers and mentors, and others

Source: Indiana Department of Health | Indiana | Active

Keep in mind: Do not issue a legal compliance determination.

[Open resource](#)

Indiana Produce Farm Registration

Good for: Explain and route Indiana produce farms to the state's registration process and current threshold guidance.

Best for: beginning growers, active growers, trainers and mentors, technical-assistance partners, IB operators, and others

Source: Indiana Department of Health | Indiana | Active — live threshold verification

Keep in mind: Thresholds and referenced years can become stale.

[Open resource](#)

Indiana Produce Safety Program

Good for: Connect Indiana produce farms to the state program implementing education, outreach, technical assistance and Produce Safety Rule activities.

Best for: beginning growers, active growers, trainers and mentors, technical-assistance partners, IB operators, and others

Source: Indiana Department of Health | Indiana | Active

Keep in mind: Program information does not establish whether a specific farm is covered, exempt, qualified exempt or compliant.

[Open resource](#)

Indiana Produce Safety Resources

Good for: Give Indiana growers and trainers access to current produce-safety templates, records, guidance and educational resources.

Best for: beginning growers, active growers, trainers and mentors, technical-assistance partners, IB operators, and others

Source: Indiana Department of Health | Indiana | Active

Keep in mind: A template or resource does not prove compliance or replace required training, inspections or farm-specific controls.

[Open resource](#)

NASDA Foundation Food Safety Programs

Good for: Explain NASDA Foundation's produce-safety work and identify linked education, outreach and state-program resources.

Best for: beginning growers, active growers, trainers and mentors, community organizations and local government, technical-assistance partners, and others

Source: NASDA Foundation | United States | Active

Keep in mind: NASDA program explanations do not replace federal or state law, inspections or agency determinations.

[Open resource](#)

NASDA GAP Certification Programs Overview

Good for: Orient growers and support organizations to GAP audit options, preparation steps, GroupGAP and related resources.

Best for: beginning growers, active growers, trainers and mentors, IB operators, technical-assistance partners

Source: NASDA Foundation | United States | Active — dated thresholds require verification

Keep in mind: Some FSMA threshold language is dated and inflation-adjusted values change.

[Open resource](#)

NASDA On-Farm Readiness Review

Good for: Connect produce farms to a voluntary, confidential educational review that helps them understand Produce Safety Rule readiness before inspection.

Best for: beginning growers, active growers, trainers and mentors, technical-assistance partners, IB operators, and others

Source: NASDA Foundation / state produce safety programs | United States | Active

Keep in mind: An OFRR does not certify compliance, replace an inspection or guarantee a regulatory outcome.

[Open resource](#)

Purdue Food Science Extension

Good for: Connect producers and food entrepreneurs to science-based food-safety, manufacturing, preservation and business-development support.

Best for: beginning growers, active growers, restaurants, institutions, trainers and mentors, and others

Source: Purdue Department of Food Science | Indiana | Active

Keep in mind: Program pages do not replace Indiana Department of Health or FDA requirements.

[Open resource](#)

USDA AMS GroupGAP Food Safety Program

Good for: Explain how growers, food hubs and marketing organizations can pool resources to pursue USDA GAP certification and access buyers.

Best for: beginning growers, active growers, nonprofit buyers, restaurants, institutions, and others

Source: USDA Agricultural Marketing Service | United States | Active

Keep in mind: Certification is voluntary and buyer-driven; it is not the same as FSMA compliance or IB approval.

[Open resource](#)

USDA Food Safety

Good for: Route users to authoritative food-safety agencies, alerts and guidance.

Best for: beginning growers, active growers, nonprofit buyers, restaurants, institutions, and others

Source: U.S. Department of Agriculture | United States | Active

Keep in mind: Portal is not a complete produce-safety compliance checklist.

[Open resource](#)

Training, Education & Skill Development

Courses, curricula, workshops, certification providers, events and learning resources.

[Back to table of contents](#)

Always Food Safe — Indiana Food Protection Manager

Good for: Offer one potential online route to an accredited food protection manager exam and training.

Best for: restaurants, institutions, trainers and mentors, IB operators, community members

Source: Always Food Safe | Indiana / commercial provider | Active — commercial provider

Keep in mind: Commercial source.

[Open resource](#)

NASDA Stakeholder Toolkit — Removing Barriers to USDA GAP Programs

Good for: Help IB and partners design equitable GAP education, outreach, partnerships and grower-support pathways.

Best for: trainers and mentors, IB operators, community organizations and local government, technical-assistance partners, funders and researchers, and others

Source: NASDA Foundation / USDA AMS | United States | Reference — current details must be verified

Keep in mind: Static 2022 toolkit.

[Open resource](#)

Purdue Advice for First-Time Gardeners: Start Small

Good for: Provides a clear, low-barrier introduction to choosing a garden site, starting at a manageable scale and preparing soil and basic tools.

Best for: beginning growers, land hosts, trainers and mentors, community organizations and local government, technical-assistance partners, and others

Source: Purdue Extension Consumer Horticulture | Indiana | Active introductory reference

Keep in mind: Written for home gardeners and originally published in 2020.

[Open resource](#)

Purdue Beginning Farmer Program

Good for: Connect new and improving farmers to statewide programs, targeted events, partner agencies, resources and the Beginning Farmer Coordinator.

Best for: beginning growers, active growers, trainers and mentors, IB operators, technical-assistance partners

Source: Purdue Extension Diversified Farming and Food Systems | Indiana | Active

Keep in mind: Program availability and registration change.

[Open resource](#)

Purdue Extension Master Gardener Program

Good for: Connect gardening learners and community organizations to local horticulture classes and trained volunteer educators.

Best for: beginning growers, land hosts, trainers and mentors, community organizations and local government, community members

Source: Purdue Extension Horticulture and Landscape Architecture | Indiana | Active

Keep in mind: Master Gardener training is consumer horticulture education, not commercial grower certification or IB competency proof.

[Open resource](#)

Purdue Junior Master Gardener

Good for: Connect youth-serving organizations and educators to hands-on garden curriculum and train-the-trainer opportunities.

Best for: trainers and mentors, community organizations and local government, technical-assistance partners, community members

Source: Purdue Extension Diversified Farming and Food Systems | Indiana | Active

Keep in mind: Not an adult commercial-production curriculum or grower certification pathway.

[Open resource](#)

Funding, Grants & Financial Assistance

Official funding, loans, grants, financial assistance and eligibility guidance.

[Back to table of contents](#)

Agricultural Management Assistance

Good for: Screen opportunities only for growers or expansions in eligible AMA states.

Best for: beginning growers, active growers, land hosts, technical-assistance partners, IB operators

Source: USDA Natural Resources Conservation Service (NRCS) | Selected eligible states | Not applicable to Indiana

Keep in mind: Indiana is not eligible.

[Open resource](#)

Farms to Incubators — Funding Sources

Good for: Provides a curated starting point for agriculture and women-focused funding opportunities.

Best for: beginning growers, active growers, technical-assistance partners, funders and researchers, IB operators

Source: Farms to Incubators | United States | Current directory — verify each opportunity

Keep in mind: Directory entries may be stale or national; never guarantee fit.

[Open resource](#)

FHLBank Indianapolis Elevate Small Business Grant

Good for: Provides a current small-business grant pathway through participating FHLBank Indianapolis member institutions.

Best for: beginning growers, active growers, technical-assistance partners, funders and researchers, IB operators

Source: Federal Home Loan Bank of Indianapolis | Indiana and Michigan | 2026 round scheduled — applications through member institutions

Keep in mind: Businesses do not apply directly to FHLBank; a member institution submits.

[Open resource](#)

IEDC Community Collaboration Fund — 2026 Materials

Good for: Preserves the 2026 Community Collaboration Fund structure and can inform future partnership-based proposals.

Best for: community organizations and local government, technical-assistance partners, funders and researchers, IB operators

Source: Indiana Economic Development Corporation | Indiana | 2026 round closed and awarded

Keep in mind: Closed/awarded round; do not present as open funding.

[Open resource](#)

IEDC FAST Program

Good for: Supports eligible Indiana technology companies pursuing federal SBIR/STTR research funding.

Best for: technical-assistance partners, funders and researchers, IB operators, developers and data teams

Source: Indiana Economic Development Corporation / Applied Research Institute | Indiana | Current program

Keep in mind: Not a general startup grant; ordinary software implementation or operations may not qualify as R&D.

[Open resource](#)

Indiana Capital Access Program

Good for: Can help eligible Indiana small businesses access lender financing through a credit-reserve mechanism.

Best for: beginning growers, active growers, technical-assistance partners, IB operators

Source: Indiana Economic Development Corporation | Indiana | Current official program

Keep in mind: Not a grant; approval, rate, collateral and guarantees depend on the lender.

[Open resource](#)

Indiana EDGE Tax Credit

Good for: Provides a future-stage incentive reference for significant Indiana job creation and expansion.

Best for: technical-assistance partners, funders and researchers, IB operators

Source: Indiana Economic Development Corporation | Indiana | Current program — later-stage relevance

Keep in mind: Not startup cash, not automatic and likely premature for an early pilot; tax and incentive advice requires professionals.

[Open resource](#)

Indiana Innovation Voucher Program

Good for: Can help an Indiana small business purchase qualified research or technical services from an Indiana research institution.

Best for: active growers, technical-assistance partners, funders and researchers, IB operators, developers and data teams

Source: Applied Research Institute / IEDC | Indiana | Current program — funding availability must be verified

Keep in mind: Not general operating capital; requires a qualified research-service relationship and current program approval.

[Open resource](#)

Indiana State Small Business Credit Initiative

Good for: Provides an official route to Indiana-backed debt, venture and technical-assistance programs.

Best for: beginning growers, active growers, technical-assistance partners, funders and researchers, IB operators

Source: Indiana Economic Development Corporation | Indiana | Current official program

Keep in mind: SSBCI is not a direct universal grant; terms and decisions are made through specific programs and intermediaries.

[Open resource](#)

ISDA Farm-Startup Grant FAQ

Good for: Correct the misconception that ISDA provides a general grant simply to start a farm and route users to appropriate financing.

Best for: beginning growers, active growers, land hosts, trainers and mentors, IB operators

Source: Indiana State Department of Agriculture | Indiana | Active

Keep in mind: Not a complete funding search.

[Open resource](#)

ISDA Grants and Funding Opportunities

Good for: Provides the official state starting point for agriculture-related grants and funding programs.

Best for: beginning growers, active growers, land hosts, technical-assistance partners, funders and researchers, and others

Source: Indiana State Department of Agriculture | Indiana | Current official hub

Keep in mind: A directory listing does not make a program open or establish eligibility.

[Open resource](#)

OCRA Building Socially Connected Communities Program

Good for: May support eligible rural community projects designed to strengthen social connection.

Best for: community organizations and local government, technical-assistance partners, funders and researchers, IB operators

Source: Indiana Office of Community and Rural Affairs | Indiana | Program page current — round status requires verification

Keep in mind: Population and rural eligibility may exclude Indianapolis/Marion County; do not generalize statewide availability.

[Open resource](#)

Patronicity Civic Crowdfunding and Matching Grants

Good for: Provides a platform and coaching model for community-led crowdfunding, including partner-funded matching-grant campaigns where available.

Best for: land hosts, community organizations and local government, technical-assistance partners, funders and researchers, IB operators, and others

Source: Patronicity | United States; programs depend on funding partners | Current crowdfunding platform - matching programs require live verification

Keep in mind: A platform account does not guarantee matching funds or fundraising success.

[Open resource](#)

Roots to Rise — Indianapolis Food Fund

Good for: Provides a highly local food-access grant and partnership route for eligible community-led garden and food-system projects.

Best for: land hosts, community organizations and local government, technical-assistance partners, funders and researchers, IB operators, and others

Source: Earth Charter Indiana | Indianapolis, Indiana | 2026 Community Catalyst Grant open when reviewed

Keep in mind: Likely requires an eligible nonprofit/community applicant; IB should not assume it can apply directly or use funds for general platform development.

[Open resource](#)

USDA Initiatives and Highlighted Programs

Good for: Monitor highlighted USDA initiatives and route to current program pages.

Best for: beginning growers, active growers, land hosts, technical-assistance partners, funders and researchers, and others

Source: U.S. Department of Agriculture | United States | Active

Keep in mind: Not a complete grant database.

[Open resource](#)

USDA Resilient Food Systems Infrastructure Program

Good for: Provides authoritative federal validation and program context for middle-of-the-supply-chain infrastructure.

Best for: active growers, technical-assistance partners, community organizations and local government, funders and researchers, IB operators

Source: USDA Agricultural Marketing Service | United States | Closed as Indiana funding; strong system-validation source

Keep in mind: Indiana described its funding as a one-time opportunity with no future rounds expected; do not present as open.

[Open resource](#)

Programs, Events & Opportunities

Current workshops, cohorts, events, calls, initiatives and participation opportunities.

[Back to table of contents](#)

NASDA Agricultural Policy Summit

Good for: Surface policy-learning, leadership and networking opportunities relevant to agriculture and state-level food-system work.

Best for: active growers, community organizations and local government, technical-assistance partners, funders and researchers, IB operators, and others

Source: NASDA Foundation | United States | Active — event date verification required

Keep in mind: Event pages can remain online after an event; do not present a past summit as an open opportunity.

[Open resource](#)

NASDA Farm2Food Accelerator

Good for: Connect food and agriculture entrepreneurs to a structured accelerator and current application or participation opportunities.

Best for: beginning growers, active growers, trainers and mentors, technical-assistance partners, IB operators, and others

Source: NASDA Foundation | United States | Active — live status required

Keep in mind: Program details and application status can change; confirm the current cohort, eligibility, location and deadline.

[Open resource](#)

NASDA Foundation Programs Directory

Good for: Discover NASDA Foundation programs that may offer education, technical assistance, policy engagement or partnership opportunities.

Best for: active growers, trainers and mentors, community organizations and local government, technical-assistance partners, funders and researchers, and others

Source: NASDA Foundation | United States | Active directory

Keep in mind: Directory is not proof that every listed program is active, open or available in Indiana.

[Open resource](#)

STARTedUP Challenge and Innovate WithIN Pathway

Good for: Provides a youth entrepreneurship and possible education-partnership pathway, not a founder program for IB itself.

Best for: trainers and mentors, community organizations and local government, technical-assistance partners, community members, IB operators

Source: STARTedUP Foundation | Indiana | Current youth program — cycle verification required

Keep in mind: Youth/student eligibility; do not present as an accelerator for Alyssa or an adult grower.

[Open resource](#)

Connections, Directories & Market Access

Directories, contacts, partner networks, supplier discovery and market-access routes.

[Back to table of contents](#)

AgriNovus Indiana

Good for: One of the strongest Indiana-specific networks for food, agriculture, data and commercialization partnerships.

Best for: active growers, technical-assistance partners, funders and researchers, IB operators, developers and data teams

Source: AgriNovus Indiana | Indiana | Current strategic Indiana partner

Keep in mind: Organization alignment does not imply endorsement, acceptance or funding.

[Open resource](#)

Applied Research Institute Initiatives

Good for: Provides an Indiana applied-research and innovation partner route beyond a single funding program.

Best for: technical-assistance partners, funders and researchers, IB operators, developers and data teams

Source: Applied Research Institute | Indiana | Current organization — initiative details require direct verification

Keep in mind: The submitted page has limited machine-readable content; do not infer program details from the directory shell.

[Open resource](#)

BioCrossroads

Good for: Provides Indiana life-sciences connections when IB work intersects health, nutrition research or food-as-health innovation.

Best for: technical-assistance partners, funders and researchers, IB operators

Source: BioCrossroads | Indiana | Current Indiana partner — conditional fit

Keep in mind: Broad food-system work alone does not establish a life-sciences fit.

[Open resource](#)

Conexus Indiana

Good for: Provides Indiana manufacturing, logistics and hardtech connections if IB develops physical infrastructure, automation or advanced logistics technology.

Best for: technical-assistance partners, funders and researchers, IB operators, developers and data teams

Source: Conexus Indiana | Indiana | Current Indiana partner

Keep in mind: Not a general food-system funder; require a clear manufacturing/logistics fit.

[Open resource](#)

ConnectIND

Good for: Provides a central Indiana entrepreneurship directory and potential pathway to organizations, people and events.

Best for: beginning growers, active growers, technical-assistance partners, community organizations and local government, funders and researchers, and others

Source: Indiana Economic Development Corporation / ConnectIND | Indiana | Current platform

Keep in mind: Directory presence is not endorsement, capacity or a warm introduction.

[Open resource](#)

IEDC Entrepreneurship Programs

Good for: Acts as an official index of Indiana entrepreneurship, capital, incentive and partner programs.

Best for: beginning growers, active growers, technical-assistance partners, community organizations and local government, funders and researchers, and others

Source: Indiana Economic Development Corporation | Indiana | Current official hub

Keep in mind: A hub page is not proof that a program is open or that a user qualifies.

[Open resource](#)

Indiana Grown

Good for: Find Indiana producers and products, support recruitment and connect growers to a state promotional network.

Best for: beginning growers, active growers, nonprofit buyers, restaurants, institutions, and others

Source: Indiana State Department of Agriculture / Indiana Grown | Indiana | Active

Keep in mind: Membership does not equal IB approval, availability, capacity or compliance.

[Open resource](#)

Kheprw Grower Resource Portal

Good for: May provide a local gateway to grower and community-garden resources connected to Kheprw and the Indianapolis Community Garden Collaboration.

Best for: beginning growers, active growers, land hosts, trainers and mentors, community organizations and local government, and others

Source: Kheprw Institute | Indianapolis, Indiana | Active landing page — child resources require verification

Keep in mind: The visible page contains limited descriptive content.

[Open resource](#)

Kheprw Institute - Community Wealth and Partner Hub

Good for: Provides an umbrella view of Kheprw's community-wealth, education, land, capital, youth and food initiatives for partnership and referral routing.

Best for: beginning growers, active growers, land hosts, trainers and mentors, community organizations and local government, and others

Source: Kheprw Institute | Indianapolis, Indiana | Current strategic local partner hub

Keep in mind: The homepage is an umbrella source.

[Open resource](#)

NASDA State Agriculture Departments Directory

Good for: Find and route users to the correct state department of agriculture when a question, program or regulation is state-specific.

Best for: active growers, community organizations and local government, technical-assistance partners, funders and researchers, IB operators, and others

Source: National Association of State Departments of Agriculture | United States | Active

Keep in mind: Directory entry does not establish program eligibility or answer state-specific legal questions by itself.

[Open resource](#)

TechPoint

Good for: Provides Indiana technology-founder, talent and ecosystem connections for the software side of IB.

Best for: technical-assistance partners, funders and researchers, IB operators, developers and data teams

Source: TechPoint | Indiana | Current strategic Indiana tech network

Keep in mind: TechPoint involvement does not validate IB's technical architecture or guarantee talent/funding.

[Open resource](#)

Procurement, Distribution & Buyer Resources

Food distribution, buyer programs, supply-chain systems and procurement context.

[Back to table of contents](#)

USDA Food Distribution

Good for: Understand federal food-distribution programs and public nutrition supply-chain context.

Best for: nonprofit buyers, restaurants, institutions, funders and researchers, IB operators, and others

Source: U.S. Department of Agriculture | United States | Active

Keep in mind: Does not define IB buyer eligibility or operating rules.

[Open resource](#)

Web Based Supply Chain Management

Good for: Federal precedent for integrated acquisition, distribution and tracking in food-assistance supply chains.

Best for: nonprofit buyers, restaurants, institutions, funders and researchers, IB operators, and others

Source: U.S. Department of Agriculture | United States | Active

Keep in mind: Architectural comparison only.

[Open resource](#)

Community Programs, Food Access & Engagement

Community gardens, youth programs, public-space and local engagement resources.

[Back to table of contents](#)

A Collaborative Partner for Small Town and Rural Planners

Good for: Understand Purdue Extension's role as a planning partner and identify collaboration pathways.

Best for: community organizations and local government, technical-assistance partners, IB operators, community members

Source: Purdue Extension Community Development | Indiana | Active

Keep in mind: Illustrative article, not a formal service commitment or program eligibility statement.

[Open resource](#)

Kheprw Growin' Good in the Hood

Good for: Provides a highly local entry point into urban food growing through no-cost plots, basic supplies or equipment and farmer mentorship.

Best for: beginning growers, active growers, land hosts, trainers and mentors, community organizations and local government, and others

Source: Kheprw Institute | Indianapolis, Indiana | Current local program — availability must be verified

Keep in mind: The page does not guarantee an open plot or current cohort capacity.

[Open resource](#)

National Association of Community Development Extension Professionals

Good for: Find community-development practices, professional networks and potential Extension expertise.

Best for: trainers and mentors, community organizations and local government, technical-assistance partners, IB operators, community members

Source: NACDEP | United States | Active

Keep in mind: Not a regulatory or statistical authority and not a guaranteed service provider.

[Open resource](#)

Purdue Community Development Guidebook — Legacy URL

Good for: Retain as provenance but route users to current Purdue Community Development and Community Planning resources.

Best for: land hosts, community organizations and local government, technical-assistance partners, IB operators, community members

Source: Purdue Extension Community Development | Indiana | Redirected / replace

Keep in mind: The submitted PDF URL no longer resolves to the guidebook.

[Open resource](#)

Purdue Extension Community Planning

Good for: Support zoning, land-use, community engagement, public-space and local-planning conversations.

Best for: land hosts, community organizations and local government, technical-assistance partners, IB operators, community members

Source: Purdue Extension Community Development | Indiana | Active

Keep in mind: Does not replace local zoning records, legal review or site-specific planning authority.

[Open resource](#)

Purdue Grass to Garden

Good for: Help organizations and residents learn how to start and sustain community-based gardens that improve food access and community development.

Best for: land hosts, trainers and mentors, community organizations and local government, technical-assistance partners, community members, and others

Source: Purdue Extension Diversified Farming and Food Systems | Indiana | Active

Keep in mind: Training does not establish land control, zoning approval, funding or ongoing management capacity.

[Open resource](#)

Soul Food Project Indianapolis

Good for: Connects Indianapolis users to a community-based urban farm, youth and adult workforce development, apprenticeship, food access, gardening and composting programs.

Best for: beginning growers, active growers, land hosts, trainers and mentors, community organizations and local government, and others

Source: Soul Food Project | Indianapolis, Indiana | Current strategic local food-system resource

Keep in mind: The homepage lists programs but does not guarantee open enrollment, jobs, apprenticeship slots, Veggie Box availability or event capacity.

[Open resource](#)

Well-being, Crisis & Farm Resilience

Farm-stress, mental-health, resilience and crisis-referral resources.

[Back to table of contents](#)

Purdue Extension Farm Stress

Good for: Connect agricultural producers, families, employers and service providers to farm-stress tools, programs, training and support.

Best for: beginning growers, active growers, trainers and mentors, IB operators, technical-assistance partners, and others

Source: Purdue Extension Farm Stress Team | Indiana | Active

Keep in mind: Not a diagnostic or emergency service.

[Open resource](#)

Policy, Research & System Context

Definitions, policy frameworks, institutional precedents and system design references.

[Back to table of contents](#)

Definitions: Sustainability and Food Systems

Good for: Define food systems and sustainability consistently in training, funding and impact documents.

Best for: trainers and mentors, funders and researchers, IB operators, developers and data teams

Source: USDA Office of the Chief Economist | United States | Active

Keep in mind: Definitions do not establish a specific compliance or scoring methodology.

[Open resource](#)

Hoosier Environmental Council — 2025 Agriculture Legislative Updates

Good for: Provide one stakeholder's summary of 2025 Indiana agriculture legislation and policy concerns.

Best for: community organizations and local government, technical-assistance partners, funders and researchers, IB operators, developers and data teams, and others

Source: Hoosier Environmental Council | Indiana | Secondary policy perspective

Keep in mind: Advocacy commentary is not neutral legal authority; bill status and enacted language must be verified officially.

[Open resource](#)

NASDA Foundation Strategic Plan 2026

Good for: Understand NASDA Foundation priorities and identify areas of strategic alignment for partnerships, funding narratives and program design.

Best for: technical-assistance partners, funders and researchers, IB operators, developers and data teams

Source: NASDA Foundation | United States | Reference — 2026 edition

Keep in mind: Strategy alignment is not a commitment, endorsement, award opportunity or proof that NASDA will partner with IB.

[Open resource](#)

NLC Food-Based Business Incubator Programs Guide

Good for: Provides a durable municipal framework and examples for food, kitchen and farm incubator programs.

Best for: community organizations and local government, technical-assistance partners, funders and researchers, IB operators

Source: National League of Cities | United States | Historical model and policy reference

Keep in mind: Published in 2020; not a current opportunity directory.

[Open resource](#)

OCRA HELP Program

Good for: Provides historical context on an OCRA community-capacity and recovery initiative.

Best for: community organizations and local government, technical-assistance partners, funders and researchers, IB operators

Source: Indiana Office of Community and Rural Affairs | Indiana | Historical/legacy program

Keep in mind: Pandemic-era program context; do not present as currently open without confirmation.

[Open resource](#)

Sustainable Productivity Growth Coalition

Good for: Provide high-level context on balancing productivity, resilience and environmental outcomes.

Best for: technical-assistance partners, funders and researchers, IB operators, developers and data teams

Source: USDA Office of the Chief Economist | International coalition | Active

Keep in mind: Not an Indiana program, dataset or direct funding source.

[Open resource](#)

U.S. Food Systems

Good for: Validate IB's role in resilient regional food systems, producer opportunity, market access and healthy-food access.

Best for: technical-assistance partners, funders and researchers, IB operators, developers and data teams, community members

Source: USDA Office of the Chief Economist | United States | Active

Keep in mind: Policy validation, not proof of program eligibility or impact.

[Open resource](#)

UN Food Systems Summit

Good for: Provide global food-system framing for selected long-form narratives.

Best for: funders and researchers, IB operators, developers and data teams

Source: USDA Office of the Chief Economist | International | Reference only

Keep in mind: Not an active local program, metric source or operational guide.

[Open resource](#)

USDA Director and Council

Good for: Understand USDA sustainability governance and identify the appropriate institutional context.

Best for: technical-assistance partners, funders and researchers, IB operators, developers and data teams

Source: USDA Office of the Chief Economist | United States | Active

Keep in mind: Office-holder and structure information can change.

[Open resource](#)

USDA Sustainability Councils and Coalitions

Good for: Support a balanced economic, social and environmental food-system framework.

Best for: technical-assistance partners, funders and researchers, IB operators, developers and data teams

Source: U.S. Department of Agriculture | United States / international | Active

Keep in mind: Policy framing only.

[Open resource](#)

Regulation, Trade & Future Expansion

Import/export, specialized forms and future-scope regulatory resources.

[Back to table of contents](#)

Export and Trade Research

Good for: Future expansion context when export markets materially affect a commodity or partner.

Best for: active growers, funders and researchers, IB operators, developers and data teams

Source: U.S. Department of Agriculture | United States / global | Archive for future expansion

Keep in mind: Outside the Indianapolis pilot scope; not a local-market planning source.

[Open resource](#)

Exporting Regulations and Policies

Good for: Future-only routing for export compliance questions.

Best for: active growers, funders and researchers, IB operators, developers and data teams

Source: U.S. Department of Agriculture | United States / destination countries | Archive for future expansion

Keep in mind: Not relevant to the current regional pilot.

[Open resource](#)

Import and Trade Research

Good for: Macro context for imports that materially affect U.S. commodity markets.

Best for: funders and researchers, IB operators, developers and data teams

Source: U.S. Department of Agriculture | United States / global | Archive for future expansion

Keep in mind: Not a local fresh-food planning source and not necessary for the initial pilot.

[Open resource](#)

Importing Regulations and Policies

Good for: Future-only routing when imported agricultural goods intersect IB operations.

Best for: nonprofit buyers, restaurants, institutions, funders and researchers, IB operators, and others

Source: U.S. Department of Agriculture | United States / origin countries | Archive for future expansion

Keep in mind: Outside current pilot scope.

[Open resource](#)

Indiana State Trade and Export Promotion Program

Good for: Provides future export assistance if an Indiana business begins selling eligible products or services internationally.

Best for: active growers, technical-assistance partners, IB operators

Source: Indiana Economic Development Corporation | Indiana / international trade | Current program — future scope

Keep in mind: Not relevant to ordinary local procurement, domestic expansion or general operating costs.

[Open resource](#)

ISDA Form 00516 — Grain Moisture Testing Equipment Inspection

Good for: Retain only for future grain-related operations requiring moisture-testing equipment inspection.

Best for: active growers, funders and researchers, IB operators, developers and data teams

Source: Indiana State Department of Agriculture | Indiana | Archive / not currently applicable

Keep in mind: Not relevant to IB's current fresh-produce model.

[Open resource](#)

Needs Review

Local, inaccessible or unclassified materials awaiting upload and review.

[Back to table of contents](#)

Local PDF — 55873 fill-in.pdf

Good for: Upload to Drive or ChatGPT before classification, extraction or agent ingestion.

Best for: IB operators, developers and data teams

Source: Unknown until uploaded | Unknown | Upload required

Keep in mind: A file:// URL cannot be accessed outside Alyssa's computer.

Link unavailable or unresolved - check the source catalog status.

Malformed OCRA Contact URL

Good for: Prevents an invalid email-as-URL submission from becoming a false web source.

Best for: IB operators, developers and data teams

Source: Indiana Office of Community and Rural Affairs | Indiana | Invalid URL — contact requires verification

Keep in mind: The submitted path is not a valid program page and may contain a stale personal contact.

[Open resource](#)

NASDA Foundation Impact Report — June 2026 submitted URL

Good for: Potentially provide recent NASDA Foundation program outcomes and evidence once the file is located and verified.

Best for: funders and researchers, IB operators, developers and data teams

Source: NASDA Foundation | United States | Needs manual validation

Keep in mind: The submitted URL did not resolve during review.

[Open resource](#)

OpenIndy Map Item aaa743c236314a6fba21e3f84f4ad19e — Metadata Unresolved

Good for: Preserves a potentially useful official local GIS layer without guessing what the layer represents.

Best for: IB operators, developers and data teams

Source: City of Indianapolis / OpenIndy Data Portal | Indianapolis and Marion County, Indiana | Needs metadata extraction

Keep in mind: The URL is official-looking, but the specific map subject could not be verified.

[Open resource](#)

OpenIndy Map Item cb2b4873bfe34a4a9e22cfb993cdd2b9 — Metadata Unresolved

Good for: Preserves a potentially useful official local GIS layer without assigning an unsupported title or use.

Best for: IB operators, developers and data teams

Source: City of Indianapolis / OpenIndy Data Portal | Indianapolis and Marion County, Indiana | Needs metadata extraction

Keep in mind: Do not guess the dataset subject from the item ID or from nearby links.

[Open resource](#)

Unidentified Graphassets PDF — submitted URL

Good for: Potentially add another useful resource after its title, publisher, date, topic and authority are identified.

Best for: IB operators, developers and data teams

Source: Unknown publisher until identified | Unknown until verified | Needs manual validation

Keep in mind: The URL returned an unidentified binary/PDF without reliable title or provenance.

[Open resource](#)

Unresolved Google Ads Click URL

Good for: Prevents an unidentified advertisement from entering the agent as a trusted resource.

Best for: IB operators, developers and data teams

Source: Unknown advertiser | Unknown | Needs manual identification

Keep in mind: The ad destination could not be recovered because the submitted link contained no usable adurl.

[Open resource](#)

Emergency Preparedness, Recalls & Response

Food emergency planning, incident coordination, recalls, advisories and response training.

[Back to table of contents](#)

Food Emergency Response Plan Supplemental Information

Good for: Explain and support the sections of the Food Emergency Response Plan template with additional guidance and reference material.

Best for: nonprofit buyers, restaurants, institutions, trainers and mentors, community organizations and local government, and others

Source: NASDA Foundation | United States | Active reference

Keep in mind: Supplemental guidance does not replace current agency protocols, emergency-management requirements or incident-specific direction.

[Open resource](#)

Food Emergency Response Plan Template

Good for: Provide a structured starting point for organizations developing a food-emergency response plan and defining roles, communications and coordination.

Best for: nonprofit buyers, restaurants, institutions, trainers and mentors, community organizations and local government, and others

Source: NASDA Foundation | United States | Active reference

Keep in mind: A general template is not an approved emergency plan and may omit organization-, hazard- or jurisdiction-specific requirements.

[Open resource](#)

IDOH Food Emergency Response Training

Good for: Connect Indiana organizations and personnel to current food-emergency and related food-safety training resources.

Best for: nonprofit buyers, restaurants, institutions, trainers and mentors, community organizations and local government, and others

Source: Indiana Department of Health | Indiana | Active

Keep in mind: Training availability changes, and course completion does not replace an organization's approved emergency procedures.

[Open resource](#)

IDOH Food Recalls and Advisories

Good for: Help users locate current food recalls and advisories relevant to products, suppliers or operations.

Best for: active growers, nonprofit buyers, restaurants, institutions, trainers and mentors, and others

Source: Indiana Department of Health | Indiana | Active — live incident source

Keep in mind: Never rely on cached recall information for an active incident; product and lot details must match the official notice.

[Open resource](#)

Tools, Equipment & Shared Infrastructure

Tool libraries, equipment sharing, mobile infrastructure, borrowing programs and feasibility case studies.

[Back to table of contents](#)

farm-ng

Good for: Provides a current example of modular agricultural robotics and potential equipment capability.

Best for: active growers, trainers and mentors, technical-assistance partners, IB operators, developers and data teams

Source: farm-ng | United States | Current company

Keep in mind: Not an accelerator; product claims require independent technical and economic evaluation.

[Open resource](#)

Hamilton County SWCD Tool Loan Program

Good for: Prevent users from being sent to a tool-loan service that is not currently operating, while preserving the lead for future monitoring.

Best for: beginning growers, active growers, land hosts, technical-assistance partners, IB operators, and others

Source: Hamilton County Soil and Water Conservation District | Indiana | Unavailable / monitor for change

Keep in mind: The page states the tool-loan program does not currently exist.

[Open resource](#)

Northwest Indiana Food Council Tool Library

Good for: Connect Northwest Indiana users to potential shared tools and equipment that can reduce startup or operating barriers.

Best for: beginning growers, active growers, land hosts, community organizations and local government, technical-assistance partners, and others

Source: Northwest Indiana Food Council | Indiana | Active — manual availability verification

Keep in mind: Inventory, eligibility and program operation may change; the page could not be fully extracted and requires live/manual verification.

[Open resource](#)

SARE Mobile Chicken Processing Unit Project FNE16-844

Good for: Offer a historical case study on mobile/shared processing infrastructure, farmer experimentation and implementation lessons.

Best for: active growers, community organizations and local government, technical-assistance partners, funders and researchers, IB operators, and others

Source: Sustainable Agriculture Research and Education (SARE) | United States | Historical case study

Keep in mind: A 2017 Pennsylvania poultry project is not a current Indiana produce-processing model or regulatory approval.

[Open resource](#)

Land Access, Leases & Local Regulation

Farmland leases, land access, zoning, agricultural ordinances, nonconforming uses and legal education.

[Back to table of contents](#)

Indiana Farm Land Leases — Key Considerations and Laws

Good for: Help growers and landowners understand important Indiana farmland-lease issues and prepare questions for a written agreement or attorney.

Best for: beginning growers, active growers, land hosts, trainers and mentors, technical-assistance partners, and others

Source: Purdue Agricultural Economics | Indiana | Active educational reference

Keep in mind: Educational material is not legal advice; law, facts and local circumstances must be reviewed by qualified counsel.

[Open resource](#)

Indiana Land Resources Council Model Ordinances — 2014

Good for: Provide historical model language and planning concepts for protecting agricultural land and considering agriculture in local ordinances.

Best for: land hosts, community organizations and local government, technical-assistance partners, funders and researchers, IB operators, and others

Source: Indiana Land Resources Council / ISDA | Indiana | Historical reference — verify locally

Keep in mind: The document was updated in 2014 and is not a municipality's current ordinance or legal advice.

[Open resource](#)

Justia — Indiana Code 36-7-4-616 Agricultural Nonconforming Use

Good for: Provide a convenient secondary view of an Indiana land-use statute while directing users to the official current code.

Best for: active growers, land hosts, community organizations and local government, technical-assistance partners, IB operators, and others

Source: Justia | United States | Secondary legal mirror — verify official

Keep in mind: Justia is not the official Indiana Code, and the page is labeled 2025.

[Open resource](#)

KPC News Farmland Lease Column — submitted article

Good for: Potentially provide a plain-language local perspective on farmland leasing after the article's title, date and contents are verified.

Best for: beginning growers, active growers, land hosts, trainers and mentors, IB operators, and others

Source: KPC Media Group | Indiana | Needs manual validation

Keep in mind: The page could not be accessed during review.

[Open resource](#)

National Agricultural Law Center — Agricultural Leases Overview

Good for: Provide a national overview of agricultural lease issues and route users to state statutes and specialized legal resources.

Best for: beginning growers, active growers, land hosts, trainers and mentors, technical-assistance partners, and others

Source: National Agricultural Law Center | United States | Active educational reference

Keep in mind: National educational overview is not legal advice and may not capture the latest Indiana-specific rule or local ordinance.

[Open resource](#)

OpenIndy Zoning

Good for: Provides the official mapped zoning-boundary layer for preliminary Indianapolis and Marion County land-use research.

Best for: active growers, land hosts, community organizations and local government, technical-assistance partners, IB operators, and others

Source: City of Indianapolis and Marion County — IndyGIS | Indianapolis and Marion County, Indiana | Current official layer — legal interpretation required

Keep in mind: The map is for reference and does not itself establish permitted use, legal compliance, variances or approval to operate.

[Open resource](#)

Purdue Commercial Ag — Legal Aspects of Indiana Farmland Leases

Good for: Provide an accessible current Purdue explanation of major Indiana farmland-lease issues and link users to deeper resources.

Best for: beginning growers, active growers, land hosts, trainers and mentors, technical-assistance partners, and others

Source: Purdue Center for Commercial Agriculture | Indiana | Active educational reference

Keep in mind: Educational article cannot determine the enforceability or terms of a specific lease.

[Open resource](#)

Purdue EC-210 — Legal Aspects of Indiana Farmland Leases and Federal Tax Considerations

Good for: Provide historical background on Indiana farmland leases and tax issues and help identify topics requiring current professional advice.

Best for: beginning growers, active growers, land hosts, trainers and mentors, funders and researchers, and others

Source: Purdue Extension | Indiana | Historical reference — superseded for current advice

Keep in mind: The publication is from 2001; legal and tax content may be substantially outdated.

[Open resource](#)

Startup Acceleration, Capital & Commercialization

Accelerators, incubators, venture studios, founder networks, startup finance, commercialization support and fundraising education.

[Back to table of contents](#)

AgLaunch and AgLaunch365

Good for: Provides a farmer-centered model for validating agricultural technologies through structured field trials and commercialization support.

Best for: active growers, technical-assistance partners, funders and researchers, IB operators, developers and data teams

Source: AgLaunch | United States | Current program

Keep in mind: Primarily agtech commercialization; do not treat it as a general food-system grant.

[Open resource](#)

Food Finance Institute Agroforestry Accelerator

Good for: Offers specialized business acceleration for agroforestry enterprises and a useful cohort-design model.

Best for: beginning growers, active growers, trainers and mentors, technical-assistance partners, funders and researchers, and others

Source: Food Finance Institute | United States | Current program — cohort verification required

Keep in mind: Specialized to agroforestry; not a general beginning-farmer accelerator.

[Open resource](#)

FoodBytes

Good for: Provides food-and-agriculture innovation intelligence and potential partner or startup discovery.

Best for: IB operators, technical-assistance partners, funders and researchers

Source: FoodBytes | Global | Current platform — offering has evolved

Keep in mind: The FoodBytes model has changed over time; do not assume its former accelerator structure remains active.

[Open resource](#)

gBETA Indianapolis

Good for: Provides a local founder program and investor-readiness network that may fit early-stage IB development.

Best for: IB operators, technical-assistance partners, funders and researchers

Source: gener8tor | Indiana | Current local program — cohort verification required

Keep in mind: Template pages may contain TBD, rolling or incomplete dates; do not infer an open cohort.

[Open resource](#)

GROW AgriFoodTech Accelerator — Legacy Program Page

Good for: Provides historical accelerator structure and investment-term context.

Best for: IB operators, technical-assistance partners, funders and researchers

Source: GROW / AgFunder ecosystem | Global | Legacy/stale — current program not confirmed

Keep in mind: Submitted link appears stale; historic terms and fees are not current offers.

[Open resource](#)

Harvest Returns — Agriculture Accelerator Guide

Good for: Provides a discovery list and plain-language overview of agriculture accelerators.

Best for: IB operators, technical-assistance partners, funders and researchers

Source: Harvest Returns | United States | Current article — secondary discovery only

Keep in mind: Commercial article; listings can become stale and may reflect publisher interests.

[Open resource](#)

Hub71 Initiate

Good for: Provides an international pre-seed venture-building option and a comparison point for accelerator terms.

Best for: IB operators, technical-assistance partners, funders and researchers

Source: Hub71 | Abu Dhabi, United Arab Emirates | Current program — verify application window

Keep in mind: Abu Dhabi-based; no assumption of direct Hub71 funding; venture-builder equity and residency terms may vary.

[Open resource](#)

New Entry Incubator Farm Program

Good for: Provides a mature farm-incubator model linking training, business planning, land, equipment and markets.

Best for: beginning growers, active growers, trainers and mentors, technical-assistance partners, funders and researchers, and others

Source: New Entry Sustainable Farming Project | Massachusetts | 2026 season closed — model/reference

Keep in mind: The 2026 season was closed when reviewed; not an Indiana enrollment option.

[Open resource](#)

Plug and Play AgTech

Good for: Potential route to corporate pilots, investors and global agtech innovation programs.

Best for: IB operators, technical-assistance partners, funders and researchers, developers and data teams

Source: Plug and Play Tech Center | Global | Current platform — cohort verification required

Keep in mind: General industry page does not establish acceptance, investment or a current cohort.

[Open resource](#)

ProVeg Guide to Alt-Protein Accelerators and Funding

Good for: Provides a sector-specific overview of alt-protein accelerators, grants, investors and crowdfunding.

Best for: IB operators, technical-assistance partners, funders and researchers

Source: ProVeg International | Global | Current guide — specialized scope

Keep in mind: Narrow alternative-protein focus; most items are not relevant to fresh-produce coordination.

[Open resource](#)

Qubit Capital — AgriTech and FoodTech Accelerator Directory

Good for: Provides a broad accelerator-discovery list for agri-food technology founders.

Best for: IB operators, technical-assistance partners, funders and researchers

Source: Qubit Capital | Global | Current article — secondary discovery only

Keep in mind: Commercial advisory content; do not treat rankings, eligibility or terms as verified.

[Open resource](#)

Qubit Capital — AgriTech and FoodTech Funding Guide

Good for: Provides a commercial overview of fundraising channels for agri-food technology startups.

Best for: IB operators, technical-assistance partners, funders and researchers

Source: Qubit Capital | Global | Current article — secondary guidance

Keep in mind: Commercial advisory content; not legal, tax, investment or grant-eligibility advice.

[Open resource](#)

Qubit Capital — The Startup Fundraising Toolkit (2026)

Good for: Provides a compact stage map, funding-instrument comparison and fundraising-process checklist.

Best for: IB operators, technical-assistance partners, funders and researchers, developers and data teams

Source: Qubit Capital | United States / global venture market | Current 2026 educational toolkit

Keep in mind: Software/venture medians may not fit IB; not legal, tax, accounting or investment advice and not a substitute for a cap-table model.

[Open resource](#)

Reservoir Farms and Venture Platform

Good for: Shows an active model for testing and commercializing agricultural robotics in real farm environments.

Best for: active growers, technical-assistance partners, funders and researchers, IB operators, developers and data teams

Source: Reservoir | United States | Current organization

Keep in mind: Not a general farm-business incubator; sector fit is robotics and advanced agricultural technology.

[Open resource](#)

Rockstart AgriFood

Good for: Potential early-stage agrifood investor and accelerator pathway.

Best for: IB operators, technical-assistance partners, funders and researchers

Source: Rockstart | Europe / global | Current organization — terms/date verification required

Keep in mind: European focus and old dates may appear on pages; never infer current terms.

[Open resource](#)

Techstars Farm to Fork Accelerator

Good for: Potential sector accelerator lead, but the submitted page contains conflicting current and historical information.

Best for: IB operators, technical-assistance partners, funders and researchers, developers and data teams

Source: Techstars | United States / global | Status contradictory — live verification required

Keep in mind: Submitted page mixes open-application language with old dates and old terms.

[Open resource](#)

TheFutureCo Accelerator and Venture Studio

Good for: Potential commercial accelerator or venture-studio pathway for mission-driven food and agriculture companies.

Best for: IB operators, technical-assistance partners, funders and researchers

Source: TheFutureCo | Global | Current commercial program — terms require diligence

Keep in mind: Potentially significant equity or control tradeoffs; marketing claims are not an offer.

[Open resource](#)

THRIVE Global AgriFood Accelerator

Good for: Potential global accelerator and customer-introduction pathway for scalable agri-food technology.

Best for: IB operators, technical-assistance partners, funders and researchers, developers and data teams

Source: SVG Ventures | THRIVE | Global | Current platform — specific cohort verification required

Keep in mind: The main site covers multiple programs; do not infer application status or terms from general marketing.

[Open resource](#)

Viva Farms Farm Business Incubator

Good for: Offers a strong operating model for combining land, infrastructure, training and farm-business incubation.

Best for: beginning growers, active growers, trainers and mentors, technical-assistance partners, funders and researchers, and others

Source: Viva Farms | Washington | Current — out-of-state model/reference

Keep in mind: Not an Indiana program; do not imply local enrollment, land availability or partnership.

[Open resource](#)

Western Growers Center for Innovation & Technology

Good for: Offers a strong industry-connected model for bringing agricultural technologies into grower testing and adoption.

Best for: active growers, technical-assistance partners, funders and researchers, IB operators, developers and data teams

Source: Western Growers | United States | Current organization

Keep in mind: Western U.S.

[Open resource](#)

Property, Parcels & Site Intelligence

Parcel maps, assessor records, property cards, state-land records, GIS layers, site screening and property-data portals.

[Back to table of contents](#)

FBN AcreVision Indiana Plat Map

Good for: Provides convenient secondary farmland parcel, soil, crop-history and valuation context.

Best for: active growers, land hosts, technical-assistance partners, IB operators

Source: Farmers Business Network | Indiana / United States | Current commercial tool

Keep in mind: Not authoritative for title, boundaries, appraisal, zoning or permission; estimates may be proprietary.

[Open resource](#)

Indiana State Property Deeds, Maps and Photos

Good for: Provides official records and maps specifically for Indiana state-owned property.

Best for: land hosts, community organizations and local government, technical-assistance partners, IB operators, developers and data teams

Source: Indiana Department of Administration State Land Office | Indiana | Current official state-property resource

Keep in mind: Not a general parcel ownership database and not proof of availability, title, zoning or permission.

[Open resource](#)

IndianaMap Statewide Parcel Boundaries

Good for: Supports statewide preliminary parcel mapping and regional site analysis.

Best for: active growers, land hosts, community organizations and local government, technical-assistance partners, IB operators, and others

Source: Indiana Geographic Information Office / IndianaMap | Indiana | Current dataset — metadata verification required

Keep in mind: Parcel geometry may be approximate or vary by county; not a survey, title boundary or ownership authority.

[Open resource](#)

Indy Data Portal — Parcels Map

Good for: Provides an official Indianapolis parcel layer for local site screening and spatial analysis.

Best for: active growers, land hosts, community organizations and local government, technical-assistance partners, IB operators, and others

Source: City of Indianapolis / IndyGIS | Indianapolis, Indiana | Current official local dataset

Keep in mind: Not a survey, title report, zoning decision or proof of ownership/access.

[Open resource](#)

Marion County Assessor Property Cards

Good for: Provides official local property-card lookup for preliminary land-host and site research.

Best for: active growers, land hosts, community organizations and local government, technical-assistance partners, IB operators, and others

Source: Marion County Assessor / City of Indianapolis | Marion County, Indiana | Current official local tool

Keep in mind: Assessor data is not a survey, title report, lease authority, zoning approval or current site-access permission.

[Open resource](#)

OpenIndy Current Land Use

Good for: Supports preliminary understanding of how land was classified for planning and zoning analysis in Indianapolis and Marion County.

Best for: active growers, land hosts, community organizations and local government, technical-assistance partners, funders and researchers, and others

Source: City of Indianapolis and Marion County — IndyGIS | Indianapolis and Marion County, Indiana | Current official layer — source vintage must be disclosed

Keep in mind: Current-land-use mapping is reference information, not current zoning, title, permission, environmental clearance or proof that agriculture is allowed.

[Open resource](#)

OpenIndy Flood Plain

Good for: Adds preliminary flood-risk context to land-host and growing-site screening.

Best for: active growers, land hosts, community organizations and local government, technical-assistance partners, IB operators, and others

Source: City of Indianapolis and Marion County — IndyGIS | Indianapolis and Marion County, Indiana | Current official layer — confirm with governing flood sources

Keep in mind: This is preliminary map context—not an elevation certificate, engineering analysis, FEMA determination, insurance conclusion or development approval.

[Open resource](#)

Composting, Waste & Circular Resources

Yard waste, composting, organic-material diversion, registered facilities, exemptions, local services and circular-resource opportunities.

[Back to table of contents](#)

IDEM Yard Waste and Composting Facilities

Good for: Explains Indiana yard-waste rules, composting exemptions, registered facilities, facility-registration requirements and local referral routes.

Best for: active growers, land hosts, nonprofit buyers, restaurants, institutions, and others

Source: Indiana Department of Environmental Management | Indiana | Current official regulatory resource

Keep in mind: Do not determine exemption, registration, permitting, land-application approval or local ordinance compliance from a general summary alone.

[Open resource](#)

Employment, Reentry & Inclusive Workforce

Employment, training, career navigation, second-chance hiring, veteran services and disability-inclusive workforce resources.

[Back to table of contents](#)

CareerOneStop ReEntry Program Finder - Indianapolis

Good for: Helps justice-impacted users locate local programs that provide employment, training and reentry support.

Best for: beginning growers, active growers, trainers and mentors, community organizations and local government, technical-assistance partners, and others

Source: CareerOneStop, U.S. Department of Labor Employment and Training Administration | United States; location-filtered for Indianapolis, Indiana | Current federal finder - live results required

Keep in mind: Finder records may be incomplete or stale.

[Open resource](#)

Easterseals Crossroads Employment Services

Good for: Connects people with disabilities and eligible families to career exploration, job placement, coaching, benefits planning, internships and long-term employment support.

Best for: beginning growers, active growers, trainers and mentors, community organizations and local government, technical-assistance partners, and others

Source: Easterseals Crossroads | Central Indiana; program-specific service areas | Current inclusive employment resource - program fit must be verified

Keep in mind: Each program has distinct referral, disability, age, income or geographic requirements.

[Open resource](#)

HVAF of Indiana Veteran Workforce Development

Good for: Connects Indiana veterans to one-on-one employment support, career training, job placement, financial-readiness resources and the VetWorks work-learn-earn pathway.

Best for: beginning growers, active growers, trainers and mentors, community organizations and local government, technical-assistance partners, and others

Source: HVAF of Indiana | Indiana; Indianapolis and Vigo County services highlighted | Current veteran employment resource - availability requires verification

Keep in mind: Do not promise enrollment, placement, stipends, tuition or tool support.

[Open resource](#)

Indiana HIRE - Hoosier Initiative for Re-Entry

Good for: Connects justice-impacted Hoosiers to career opportunities, training and support while helping employers reach pre-screened candidates.

Best for: beginning growers, active growers, trainers and mentors, community organizations and local government, technical-assistance partners, and others

Source: Indiana Department of Correction | Indiana | Current official Indiana reentry employment program

Keep in mind: Do not promise placement, wages, eligibility or employer acceptance.

[Open resource](#)

OACRA Indiana Reentry Employment Directory

Good for: Offers a broad Indiana discovery list of direct employers, staffing agencies, workforce centers, training programs and reentry job-readiness resources.

Best for: beginning growers, active growers, trainers and mentors, community organizations and local government, technical-assistance partners, and others

Source: OACRA LLC | Indiana | Current secondary directory - verify every listing

Keep in mind: Private directory, not a government authority.

[Open resource](#)

PACE Indianapolis - Employment and Organization Opportunities

Good for: Provides a direct route to current employment or volunteer opportunities with a leading Indianapolis reentry organization.

Best for: beginning growers, active growers, trainers and mentors, community organizations and local government, technical-assistance partners, and others

Source: PACE Indianapolis | Indianapolis, Indiana | No current job openings when reviewed - volunteer and future-opportunity reference

Keep in mind: The page stated there were no current openings when reviewed.

[Open resource](#)

Work for Warriors Indiana

Good for: Provides employment assistance to Indiana National Guard members, reservists, veterans and dependents by translating military experience into civilian career opportunities.

Best for: beginning growers, active growers, trainers and mentors, technical-assistance partners, IB operators, and others

Source: Work for Warriors Indiana | Indiana | Current military and veteran employment resource

Keep in mind: Service eligibility is population-specific.

[Open resource](#)

Connections, Directories & Referrals

Resources grouped around this topic.

[Back to table of contents](#)

NASDA GAP Toolkit NGO Contact List

Good for: Provide leads for organizations that may support GAP outreach and underserved growers.

Best for: IB operators, technical-assistance partners, community organizations and local government, developers and data teams

Source: NASDA Foundation | United States | Reference — verify contacts

Keep in mind: Contact list may be stale or geographically irrelevant.

[Open resource](#)

Purdue ASEC Closure and Program Transition

Good for: Prevent users from being routed to a closed department and direct agricultural-education questions to the current Agronomy program.

Best for: trainers and mentors, technical-assistance partners, IB operators, developers and data teams

Source: Purdue College of Agriculture | Indiana | Redirect / closed department

Keep in mind: ASEC closed June 30, 2026.
